

Intellectual Property Rights 5.16

Book 2 Patent Agents

Thank you for downloading this document.  
This is part of the series “Unusual careers”. Lesser known careers are being researched and compiled by Mrs. Shobha Mathur.

This document provides valid links to various sites. All the links are working and secure as on May 2016.  
For any suggestion, amendment, criticism or praise, please contact me at [shobham@yahoo.com](mailto:shobham@yahoo.com)

Unusual Careers

## Preface

I have revamped this document as I found after five years many links were not working or were defunct. Now many new courses are included.

The data is too vast and varied for a single volume. Hence this is in three parts.

- Part 1 is named Intellectual Property Rights dealing with basic info and types. Please read it to familiarize yourself with the concept.
- This is part 2, dealing with Intellectual Property Rights jobs and courses. This covers courses for Patent agents and patent Examiners .
- Part 3 is about Trademark Agents and other Intellectual Property Rights courses.

This is an online research and only those institutes which have a valid web presence have been covered.

Some institutes give all the information at one place and some ask you to write to them, I have given e mail addresses of all.

Almost all courses require advance planning. Many are advertised in papers, and a deadline given for applying, examinations and admissions. You should keep in touch with the institute and follow dates.

## Intellectual Property Rights

All societies respect and uphold the right of a person to his personal property.

Three kinds of personal properties are recognized:

- Movable Property\_\_\_\_\_Cars, Furniture, Phones
- Immovable Property\_\_\_\_Land, Buildings, Farms
- Intellectual Property\_\_\_\_Literary works, inventions

We know about the first two as they are always visible and recognizable.

The third kind is more abstract and, difficult to recognize and define.

### **Categories**

The Intellectual Property Rights are classified into eight categories with different laws and life of protection.

1. Copyright
2. Patent
3. Industrial Design
4. Trade Marks
5. Geographical Indication
6. Designs of Integrated Circuits
7. Trade Secrets
8. Plant Breeder

Here we are mainly concerned with Patents Agents and Patent Examiners.

People need help with these rights and the procedure can be quite complicated for a lay person. Now several courses are offered for Patent agents which are covered here.

In India, patents, trademarks, Design and geographical Indication related matters are under Controller General of Patents, Designs and trademarks, Department of Industrial Policy and Promotions, Ministry of Commerce and Industry.

<http://www.ipindia.nic.in/>

Copy right has its own office <http://copyright.gov.in/>

All others have their offices too, but we are not really concerned with them here. The relevant information and addresses are provided in the document Intellectual Property Rights .

The current scenario of globalization and online business is excellent for IPR practitioners in India and the demand can only grow,

Any candidate should ideally select more than one domain based on his educational background.

Candidates of non-technical background with degree in law can select Trade Mark Prosecution and/or Litigation, while candidates with technical backgrounds can go for Licensing, Litigations, Patent Prosecution having designations like Patent Agent / Patent Analyst / Patent Specialist / Patent Engineer, etc.

Easiest way of becoming an IPR professional is to join a law course with IPR specialization. Most Law collages now have an Intellectual Property Rights related course.

If you have a science background and have some work experience in research, then you could join a post-graduate diploma programme.

If you are a graduate or an undergraduate from any discipline including practicing professionals, lawyers, scientists with a good command over written and spoken English you could join a short-term certificate course.

You can also undergo one-year part-time programmes which are meant for technologists, scientists, lawyers and management professionals requiring an in depth understanding of intellectual property rights management.

## **Patent Agents**

This can be a lucrative career only after higher studies in any science subject. If you can grasp a concept and write about it, you may have a flair for it. There are only about 1800 agents on 1<sup>st</sup> May2016 according to the electronic register published by the Office of the Controller General of Patents, Designs & Trademarks. <http://ipindiaservices.gov.in/Agentregister/patent-agent.aspx> You have to pass the India Patent Agent Examination to become a Registered Patent Agent in India.

This is a lifelong professional qualification. You have to pay maintenance fees to keep it valid for up to 10 years at one time. This

permits you to draft all necessary documents for approval before the **Indian Patent Office.**

Trademarks agents and copyright registrations also partially come under this.

### **What is a patent**

A patent is a set of absolute rights granted by a National Government to an inventor for a limited period of time for an invention. It can be a new item or gadget, or even a process. Only an idea cannot be patented if there is no concrete process to realize it.

Research and innovations need to be protected for some time so their owners can earn some profit on their labors.

A patent gives legal rights to the holder to sell or lease the product or to prosecute anyone using it without his permission during the protection term. All the actual processes have to be documented exactly detailing all the steps and requirements before the patent is granted. This is where a skilled agent is needed.

### **Term of patent**

Normally a patent is effective for a period of 14 years from the date of application subject to the payment of renewal fees.

But when it is related to food, medicine or drug, it is 5 years from the date of selling of patent or 7 years from the date of patent whichever is shorter.

### **Patent Management**

Research and innovation is happening in a big way in India today. According to Technology Information, Forecasting and Assessment Council (TIFAC) every year the electronic industry files at least 600 applications. “There are entrepreneurs who want good advice on the global patent scenario, but there isn’t much of that available” says a TIFAC official.

Indian firms, especially small and medium enterprises, desperately need more and better agents, qualified in the sciences, to make the most of their research.

Indian Patent Office receives more than 40000 (approx.) applications every year.

The rules and the time limit for patents differ from country to country. Usually a patent is valid only in the granting country. But now in the global economic cooperation, countries are joining hands to make patent eligible across nations.

India is now a signatory to the Patent Cooperation Treaty. It means that once a valid patent has been filed in India the innovation is valid in 150 countries.

Indian patent agents need to liaise with patent examiners from the US, Europe and China. Thus, it is necessary for agents to be able to deal with foreign examiners, who are well versed in technology.

The main goal of patent management is obtaining and maintaining patents. This process involves various technical, legal and business skills.

### **The process**

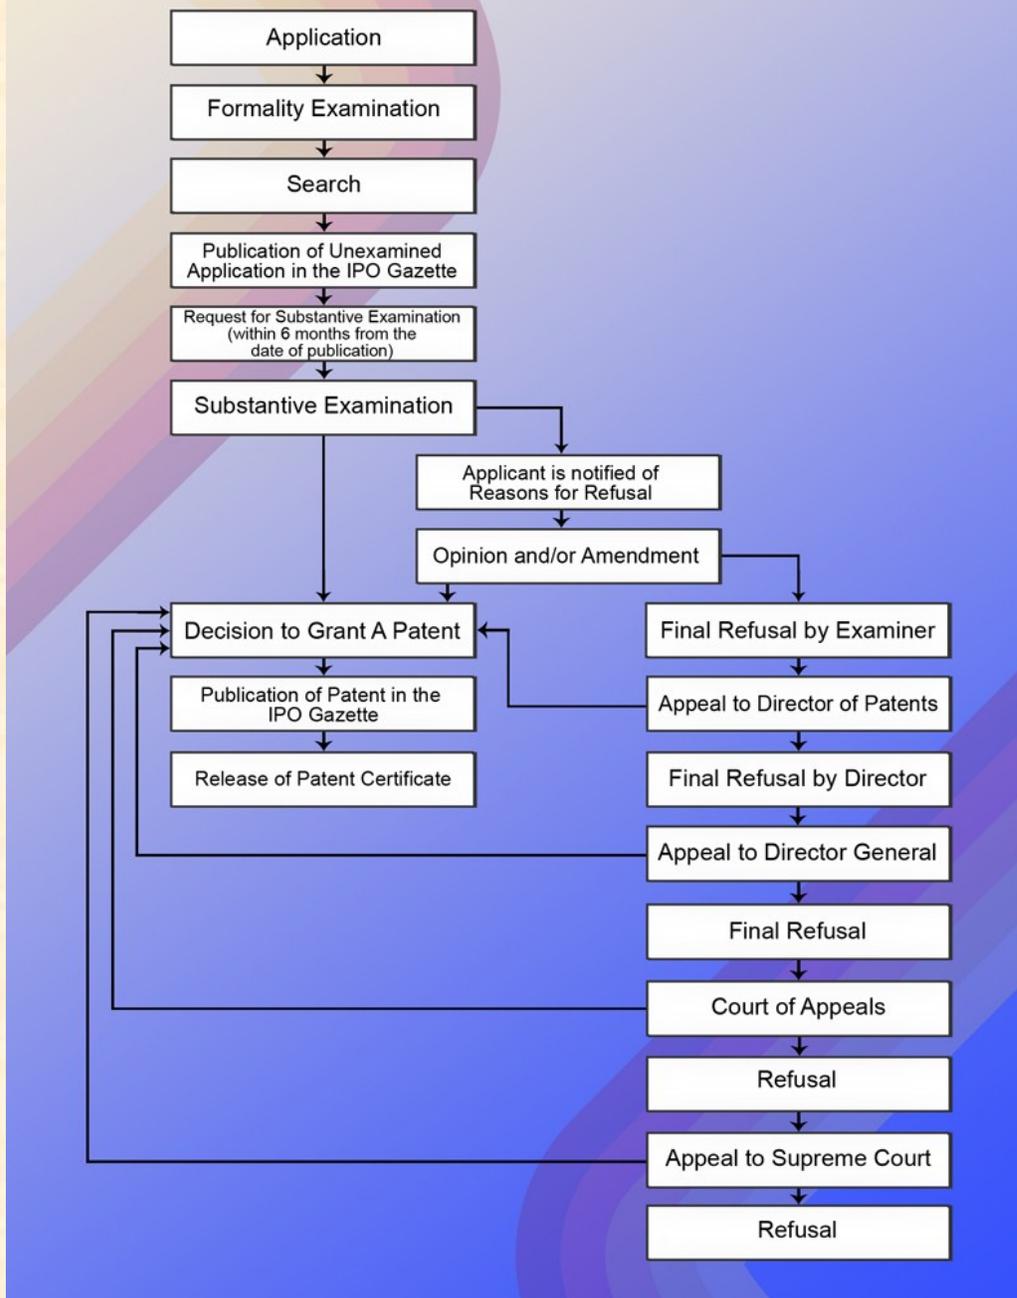

Most of the processes are similar but not identical in application.

1. Search – This is two kinds and there are separate databases to make this search both on National and International status.
  - I. There is a list of things which cannot be granted protection to anyone.
  - II. You have to search for any duplicate before a new one is granted
2. Examination – The registrar examines the application and if any questions are raised they have to be answered.
3. Publishing - This is published for public view and anyone can object which will be noted and has to be replied by the prospective owner.
4. If there are valid concerns both parties are confronted and asked to present their case.
5. If the case is won the protection is granted for a specified time which may or may not be renewable.

All this takes considerable time and effort so all of these need a fee. They can also take up to two years to finalize.

These are legal processes and quite complicated so it is advisable to use a trained and certified agent to work for you. The following flow chart explains the steps.

## PATENT APPLICATION FLOW CHART

### **What is a Patent Agent**

A Patent agent is a registered person with Indian Patent Office whose name is entered in the patent agent register after being declared qualified the patent agent examination conducted by the patent office and who is entitled—

(a) To practice before the Controller; and

(b) To prepare all documents, transact all business and discharge such other functions as may be prescribed in connection with any proceeding before the Controller under this Act.

## **What a Patent Agent does**

The Patent agents help people with the process of getting patents.

An application for a patent in the prescribed form along with the prescribed fee has to be filed in appropriate office. It has to be accompanied with written detailed documents

The Agents help with the complete process from search, drafting, examination, and queries.

### **Drafting**

Writing a patent is a craft, requiring both intelligence and rigor.

This is a job for highly qualified science or engineering graduates as they have to understand the invention, its ingredients or parts, uses and applications. Only then they can write coherently about it.

A badly drafted patent destroys the value of the item. This is where an agent with suitable education counts. A biology person will not be able to draft an engineering process, and an engineer will not be able to grasp the medicinal requirements of a drug.

Knowing the laws can help but is not necessary, as usually legal firms employ Patent Agents to write about the inventions and usually someone else looks after the legal angle. But anyone with legal knowledge obviously has more value.

### **Searching**

Meticulousness is very important. Before drafting, agents search through heaps of data on already filed patents. This confirms whether the innovation is bona fide to be patented and is not an infringement upon an already existing patent elsewhere.

An inventor needs to know whether and how his invention can be globally patentable.

All this means hard work and an agent can be busy for a month or more writing one draft.

The patent agent liaison with both product developers and their legal team to make sure filing is done properly.

A patent agent may also be involved in prosecution or may be involved in the long-term management of a client's patent portfolio.

Hence he may work with developers, the business team, other patent agents and patent attorneys. In addition to a thorough knowledge of local rules and the Manual of Patent Examination Procedure (MPEP), the he must know the rules, regulations, and

documents associated with the International Patent Cooperation Treaty (PCT).

This certification is valid only for Indian citizens and by Indian patent office. Anyone desiring to practice outside the country needs to qualify patent agent exam of respective countries.

## **Jobs**

- Consulting Firms hire agents with a technology background, including PhDs and scientists. Some firms handle more than 150 applications from clients (including many small businesses) every year. And the number is increasing.
- Their key task is patent drafting, but there are other activities as well, including search, prosecution, litigation and tracking management.
- Patent Agents are employed in most of the corporate having R & D background to check the inventions developed, infringement activities of their routine procedures etc.
- An agent can freelance too as consultant to various companies.
- He can join as academician in institutes teaching Patent Law.
- He can join as Patent Examiners / Patent Analysts with the IP Offices

## **Remunerations**

Law firms deal with a wide range of clients and offer end-to-end solutions for a patent grant. They typically employ agents. Starting salaries for agents at top law firms vary between Rs 30,000 and Rs 40,000 per month. "For the corporate sector and scientific institutions, agents with strong domain expertise, including PhDs, are preferred. Senior levels can go up to 12 Lacs/ annum.

The small and medium enterprise sector which cannot afford to employ law firms opt for services of patent agents who are practicing on their own.

## **The Examination**

Controller General of Patents & Trademarks conducts the examination under the Section 126 of the Patent Act.

Patent Agent or Patent Attorney Examination: Ministry of Commerce and Industry (Govt. of India) conducts Examination through Patent Offices at New Delhi, Mumbai, Kolkata and Chennai twice in the months of May and November.

For the last 2 years, the exam is being conducted in the mid of January and on weekends. But the exact date of the next exam can be intimated only after Indian Patent Office issues the notice or announcement of the next exam.

## Exam Syllabus and Pattern

The materials for the exam are

- Patent Act 1970
- Manual of Patent Practice and Procedure
- Drafting license agreement and patent drafting
- Interpretation of patent specification.

The qualifying examination shall consist of the following papers and marks, namely: -

	Subject	Type	Marks
Paper I	Patent Act and Rules	Part A1: The subsection is of 30 marks with 15 Multiple Choice Questions of 2 marks each. Each question will have a maximum of six choices and minimum of two correct choices. Part A2: This subsection will have 10 true and false type questions of 10 marks each.	100
Paper II	Drafting and interpretation of Patent specification and other documents	It will consist of eight subjective type questions. Candidates are required to answer any 6 out of the 8 questions. Paper 02 will also consist of two parts <b>Part A:</b> The section will contain six questions of 10 marks each. Candidates are required to attempt any four of the following questions. The questions will relate to drafting and interpretation of patent specifications and other documents required to be submitted under the Act and Rules. <b>Part B</b> (This section comprises of two sub-sections) <b>Part B1:</b> This is a compulsory section and will consist of one question and will be related to drafting of claims and abstract from the given description of an invention. <b>Part B2:</b> This sub section consists of two questions. Candidates are required to answer any one. One question may relate to general engineering while the second may be related to chemistry or	100

	Subject	Type	Marks
		life sciences.	
Viva Voce	Viva-voce examination will be based only on domain knowledge	Question which cannot be discussed in the written paper are asked in the viva. Both pin pointed and purely subjective questions are asked by the examiners. Having a question bank can help.	50

Total marks: 250

A candidate shall be required to secure a minimum of fifty marks in Paper-I and Paper-II and shall be declared to have passed the examination only, if he obtains an aggregate of sixty per cent of the total marks.

Clearing Patent Agent Exam means you completely understand the rights and duties of an inventor or researcher with respect to the invention and also that of the government towards these inventors.

Till 2010, the exam was conducted at the 4 patent offices of Indian, namely, Delhi .Kolkata, Chennai and Mumbai. But as the number of applicants is increasing in 2011, Patent Office allotted college and university centers for conducting the exam. So it might be same in the future. The Centre is mentioned in the admit card you will receive via mail from the Indian Patent Office.

You may appear for the exam as many times as you wish and until you qualify as a Registered Patent Agent.

### **Help for Exams**

You should download and read the Bare Act – The Patent Act 1970 from the internet. It is the basis of the Patent Agent Exam.

Or you can join courses offered by various institutes on Patent Agent Examination Preparation.

**Older papers** can be downloaded from here:

[http://ipindia.nic.in/ipr/patent/patent\\_agent/exam\\_paper.htm](http://ipindia.nic.in/ipr/patent/patent_agent/exam_paper.htm)

### **How to apply**

When the notification appears only then you can apply.

Fill the application Form for Indian Patent Agent Examination on official website [www.ipindia.nic.in](http://www.ipindia.nic.in)

Forms can be filled on the website or can be downloaded, filled up and sent physically to the specified postal address.

Detailed instructions related to registration are posted on website. Fill the form accordingly.

Candidates are required to fill details in online application form. A printout of the application form should be also taken.

The form with the necessary enclosures and examination fee should reach the following address

The Controller General of Patents,  
Designs and Trade Marks,  
Boudhik Sampada Bhawan,  
S.M. Road, Antop Hill, Mumbai 400 037

### **Eligibility**

- Indian Nationality
- Age Minimum 21 years
- Minimum one science based graduation [degree in science, engineering or technology from any university established under law in India or possesses such other equivalent qualifications as the Central Government may specify in this behalf – BSc, MSc, B. Pharma, M. Pharma, BE, ME, B.Tech, M.Tech, PhD, MBBS etc.
- Graduation should be complete. Final year candidates are eligible as long as they are able to produce final degree, mark sheets etc. within 2 months of declaration of the Patent Agent Exam result they are appearing for.

Any lawyer (having a degree in Law and enrolled with the Bar Council of India) can represent clients in front of a court about **patent litigation matters**.

BUT, the Indian Patent Statute (Indian Patent Act 1970 and as amended since 2002) requires that a lawyer must have a basic degree in Science, Engineering, or Medicine and should have cleared the patent agent examination, in order to represent clients in **patent prosecution matters (patent filing, office action responses, patent opposition etc.)**.

### **Documents to submit:**

- An attested copy of proof of age of at least of 21 years;
- Copy of the certificate of a degree in science, engineering or technology from any university/institute.
- One Character Certificate in original from a person of responsible capacity (e.g. Any Gazetted Officer from the Central Government or State Government, Heads of Educational Institutes or Autonomous bodies etc).
- Two copies of self-attested passport size photographs.
- Two Specimen Signatures in a sheet of paper.
- Cheque or draft for the fee.

After passing the examination the person has to submit a form for registration, along with prescribed fees. The Controller satisfies himself on all counts and then his name is entered in the register of patent agents.

## **Patent Examiner**

### **Who is a Patent examiner**

A **patent examiner** is a civil servant with a scientific or engineering background, working at a patent office.

Major employers of patent examiners are the [European Patent Office \(EPO\)](#), the [United States Patent and Trademark Office \(USPTO\)](#), the [Japan Patent Office \(JPO\)](#), and other patent offices around the world.

### **Duties**

1. To read, understand and review the technical information disclosed in a patent application.
2. To determine whether the application is legally patentable.
3. To search if a duplicate has been patented.
4. To determine whether it complies with the legal requirements for granting of a patent..
5. To validate the originality of a new idea or product.
6. The patent examiner must approve or reject a claim based on research as well as interaction with inventors and patent attorneys.

Patent examiners develop specialist expertise within a particular area such as biotechnology or electrical engineering, but opportunities may arise to change specialist subject areas.

### **Usual work activities:**

- Investigating application to ascertain that the invention is described clearly and in such a way that a skilled person would be able to use it;
- Examining the invention from a technical standpoint;
- Searching through earlier publications, technical literature and online databases to make sure that the application is new;
- Considering legal matters affecting acceptability and entitlement to the monopoly claimed by the applicant;
- Gathering information to base a judgement as to the originality of the invention;
- Preparing an initial report and giving the results of the search to the applicant or, more usually, a patent agent, who then decides whether to proceed to the second stage of the application;
- Making a final decision as to the novelty of the invention, which is written in a final report;

- Discussing and negotiating with the applicant and patent attorney to resolve any matters raised in the final report;
- Presenting cases at hearings before a principal examiner;
- Maintaining up-to-date knowledge of developments through study and visits to laboratories, factories, exhibitions and seminars;
- Occasional specialised work, such as intellectual property policy, information retrieval and publicity.
- Examiners are expected to determine patentability within a limited amount of time. Some patent applications are easy for an examiner to assess, but others require considerably more time. This has given rise to concern that quality of work may suffer.

### **Educational Qualification As per Discipline:**

At least a Bachelor's Degree, or more preferably a Masters in the chosen field. Note: Candidates having Research experience of three years or more from a recognised university or R& D institute/ Organisation; Having Degree in Law of a recognized University; Have Certificate/ Diploma from a recognized University/ Institute in a foreign language in German, French, Russian, Spanish, Chinese, Japanese; will get preferred.

### **Employee salary**

EXAMINER of PATENTS & DESIGNS salaries at Government of India can range from ₹59,873-₹64,819.

### **PATENT EXAMINER'S TRAINING**

The Department of Industrial Policy & Promotion (DIPP) has approved a one year training program for newly recruited Examiners of Patents & Designs. The new Examiners will undergo three months of Institutional Training at NIIPM, Nagpur followed by eight months of on the job training at various patent offices. Thereafter, they will further undergo an advanced training of one month on Patent Law & Examination methodology at NIIPM Nagpur.

### **Controller General of Patents, Designs & Trademarks**

[‘Syllabus for initial three months training course as approved by DIPP’](#)

### **CGPDTM Examiner of Patents and Design Recruitment**

<http://www.employment-news.in/ipindia-dipp-cgpdmt-recruitment-2015-16-examiner-of-patents-and-design-jobs-notification/>

Office of the Controller of Patents Design and Trade Marks, under Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India, notifies occasionally for **recruitment** for the posts

of **Examiner of Patents and Design** inviting online applications from eligible candidates.

Place of Posting; Chennai, Delhi, Kolkata, and Mumbai

Age Limit: Minimum 21 years and Maximum 35 years

## **Courses and Institutes**

There are several institutes offering a variety of courses to help with the examination.

I could see several more names when I researched, but they simply wanted your money, there was no valid address or email upfront. Beware of such sites. If they are not giving their complete address, and have a free email for contact they may be fraudulent.

Many of these courses are online or distance ones. Go through the method of teaching, course material and see whether there is support for getting a job, before parting with your money.

All this information is correct as on May 2016.

### **1. Federation of Indian Chambers of Commerce and Industry (FICCI) <http://www.ficciipcourse.in/>**

#### **Online Course coverage**

Patents and International Filing System, Trademark, Copyright, Design, Geographical Indication, Biodiversity, International Arrangements and IPR Enforcement: Infringement and Remedies.

#### **Who Can Pursue**

Students from Law, science and other disciplines, Lawyers, Patent Agents, Professionals from Industry fields like Electrical / Computer / Chemical / Mechanical / Research and Development and other scientific domains, enforcement personnel, etc.

#### **1. Conduct of Online Course on IPR**

Online Certificate Course on IPR would be conducted thrice a year in the months of January- March, May - July and September - November.

The registration for courses in the months of January- March, May - July and September - November would start one month prior to the start of the course

Course Duration: 3 Months

Course Fees :

- For Students: Rs **7500/-**
- For Participants from MSMEs: Rs. **8500/-**
- For Participants from Industry: Rs. **10,000/-**
- For Others: Rs. **10,000/-**

## **2. Online Certificate Course on Competition Law & Intellectual Property Rights (IPComp).**

This advance course provides dual benefits of learning Competition Law & IPRs challenges faced by Corporations when they expand in an organic or non-organic manner into new territories, markets and products

Course Duration: 2 Months

Eligibility

- Students from Law stream
- Lawyers
- Professionals from Industry
- Student pursuing Company Secretary Course

Course Fees :

- For students : Rs. 5500/-
- For Industry Professionals : Rs. 7000/-
- For Others : Rs. 7000/-

## **3. Online Certificate Course on IPR and Pharmaceutical R & D (CCIPR)**

Course Duration: 6 Months

Module I - The Pharmaceutical Business

Module II - The Pharmaceutical Research and Development

Module III - Intellectual Property Rights: introduction

Module IV - IPR - With specific reference to Pharmaceuticals

Module V - IPR - Indian Patent Scenario

Module VI - Case Paper (50 Marks)

Course Fees :

For Students: Rs **10,000/-**

For Industry Professionals : Rs. **15,000/-**

**Eligibility**

- Any student in pharmaceutical sciences doing B. Pharm, M. Pharm, PhD.
- Pharmaceutical industry persons (junior levels).
- Those interested in career in pharmaceutical research from the faculty of Medicine, Biotechnology, Chemistry, Biosciences, Sciences, Life sciences and others.
- Those willing to enter Pharmaceutical R & D, Formulations, Generics, NDDS, Regulatory affairs, Drug discovery, Clinical research, Toxicology, International Business, Business strategy and the like.

## Contact

Federation of Indian Chambers of Commerce and Industry (FICCI)

Contact : 011-23487477, Email:- [ipcourse@ficci.com](mailto:ipcourse@ficci.com)

## 2. Indian Law Institute (ILI)

<http://www.ili.ac.in/e-learnIPR.htm>

Indian Law Institute established a sound framework for the classroom teaching and now plans to embark on e-education.

### Who can pursue?

Anyone with access to computer and the Internet can benefit.

Most beneficial to :

- Students
- Lawyers
- Law enforcement personnel – customs officials, police officials, etc.
- Patent agents
- Intellectual Property Offices in Government Sector
- Engineers
- Scientists
- Software Professionals
- Company Executives
- Economists
- Journalists
- Government Officials

### Syllabus

The syllabus is divided in four components:

- Patents
- Copyright and neighbouring rights
- Trademarks, Geographical Indications and Domain Names
- Management of Intellectual Property Rights

**Duration** Three months

**Fee** - Rs. 5,000/-(Rupees Five Thousand) / 100 US\$ (for foreign students)

### 14. TMP

TMP India Patent Agent Exam Training course is a strict training to enable you to master the **India Patent Law** to get through the exam easily.

The Course runs for 75 days and out of that you have to write tests and revision exams for 45 days

The tutorial will consist of Patent Act, Patent Rules, Patent Forms, Manual of Patent Practice and Procedure, Past Question Papers

and their Answers, Important Sections and Rules from which questions are bound to be asked.

The sections, Rules and Forms consist of Text material, Audio of the text and Video of the text. You view the video first, listen to the audio and then study the text material and answer the few questions asked from the particular section.

We have devised the system in such a way that only after you correctly complete one section you can go to the next section.

And only when you complete the Act, you can go to the Rules.

You will also receive an e-book with the above subjects in the text format so that you can have a back up in your computer if there is a problem in Internet connection or if our server is down. You can print out the material and have them spiral bound in three or four files and available handy for you.

You can download the audios of the course material and I encourage you to buy an MP3 player and listen to the audio as much as possible.

The coaching classes run for about 75 days or one day before the examination whichever is later.

You will have to write, two tests per week in the starting phase, 3 tests per week in the second month, 4 tests per week in the third phase and 5 tests per week from the 4th phase onwards. Each phase will be for 2 weeks.

From the 45th day you will start learning patent drafting and patent documentation like Assignment, Licensing, writing opinions etc. and you will start writing them

What do I mean by write the tests?

Most of us have forgotten how to write on a paper. In the Patent Agent examination you have to think very quickly and write very fast. **And you have to write for 5 hours in one day.** Many are not able to write the examination in time and fail. We are training you to get through.

You can join the course now. You need to complete all in about 75 days and then keep writing the revision Exams.

When you clear it you get a lifelong professional qualification. There is no retirement unless you do not want to take work. A lifelong income is assured.

**Application Form:**

Application form can be [downloaded here](#). Please print out the form, complete it and send through courier.

**Fee: Rs.25,000** Fee is also payable in two installments of Rs.12,500, in two consecutive months

**How to pay:**

Payment to be made through DD / Local Cheque payable to 'Janaki Natarajan' at 'Chennai'.
